

# Introducing CURV™

Curv™...bringing privacy to open spaces.

Curv™ is a range of acoustic work areas that enable semi-private open spaces. In open space plans, there are times when you need to find your own space. Your work or learning environment must facilitate privacy to concentrate and yet have enough openness to invite collaboration. Curv™ serves both these purposes, with many versions to allow the best of both worlds. Many Curv™ models are fully customizable!
